**MEDICAL CONDITIONS
AGGRAVATED BY EXPOSURE:
RECOMMENDATIONS TO
PHYSICIANS:**

Respiratory problems may be aggravated by inhalation of nuisance dusts.

All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

Section 5: Fire-Fighting Measures

**SUITABLE
EXTINGUISHING MEDIA:
UNSUITABLE
EXTINGUISHING MEDIA:
UNUSUAL FIRE AND
EXPLOSION HAZARDS:**

Use fire extinguishing materials appropriate for surrounding fire including water spray (for cooling), dry extinguishing media, carbon dioxide, and foam.

No known unsuitable extinguishing media

Severe to extreme explosion possibilities exist whenever wood dust has been allowed to accumulate in roof areas or wall supports. A small initial explosion may be followed by a larger explosion after the dust has been dislodged. In buildings with automatic sprinkler protection, the explosion may disconnect sprinkler piping or open sprinkler heads where there is no fire, greatly reducing the effectiveness of the sprinkler system.

This product has no hazardous combustion products.

**HAZARDOUS
COMBUSTION
PRODUCTS:
SPECIAL FIRE FIGHTING
PROCEDURES:**

Incipient fire responders should wear eye protection. Structural firefighters must wear Self-Contained Breathing Apparatus and full protective equipment. Isolate materials not yet involved in the fire and protect personnel. Move containers from fire area if this can be done without risk; otherwise, cool with carefully applied water spray. If possible, prevent runoff water from entering storm drains, bodies of water, or other environmentally sensitive areas.
